Dear Parent:

In our music classes we are studying instruments and sound production. As part of your student's learning we will be building/creating musical instruments. Your student should have already brought home the assignment and it is attached here. Students are required to make a simple musical instrument and present it in class. I encourage you to help them use materials found around the house, however students are not limited to those items and may be as creative as they are able. I hope you will encourage your student to meet the requirements of the assignment by following the instructions sent home. The instructions will also be posted online.

Please check out my website that will be updated with information about musical instruments and the activities in our classes: <http://www.TheSingingBeal.weebly.com/>

When you click on the Beal Hive you will find documents and links to help your student.

If you have any questions don't hesitate to call: (301) -805-2750 or email: natalie.beal@pgcps.org

Thank you in advance for your support.

Sincerely,

Natalie Beal
